

Vinyl Graphic Application Instructions

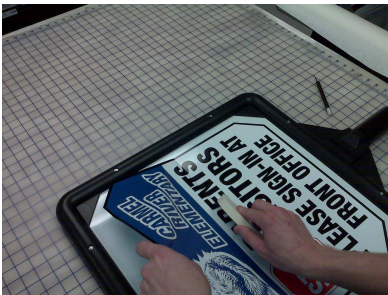

Before you begin, be sure to clean the sign surface of dirt and grease to ensure proper adhesion. Do not use application fluid for this type of vinyl, it is made to stick dry.

- 1) Place graphic on sign surface in desired position. Place a piece of masking tape on each side of graphic half way down to create a folding point.

- 2) Pull back half of the graphic and remove white backing film. Make sure to keep the graphic from sticking to any surfaces.

- 3) Holding the graphic slightly away from the surface, begin application (using a felt squeegee not to scratch the surface) by starting at the center and working your way to the outside until all the air is removed.

- 4) Repeat step 3 for the other half of the graphic. Be sure to not press too firmly to ensure that you do not scratch the graphic.

Attention: Decker Equipment will not be held responsible for any damages during the process of the vinyl graphic application process.

All vinyl graphics are non-returnable.
